PROFILE

Founder-operator, board director, and startup mentor with experience building products, partnerships, and operating systems across B2B SaaS, cyber/compliance, sport tech, consumer tech, edtech, and hardware. Led Secberus through a shift from traditional SaaS to an AI-first API product suite, and use AI across product discovery, research, writing, GTM, and operating workflows.

Commercially technical operator: credible with engineering teams, technical customers, and partners; comfortable reading API docs, testing basic API calls, using SQL-based workflows, structuring prompts, and translating technical capabilities into practical commercial use cases. Strong fit for cross-functional startup roles in product, partnerships, operations, founder support, corporate development, and project / program management.

CORE STRENGTHS

AI-Enabled Product Strategy • API & AI Workflow Fluency • Product Commercialization • Product Discovery • Strategic Operations • Founder Support • Project / Program Management • Strategic Partnerships • Corporate Development Support • Board & Investor Materials • GTM Strategy • Customer Discovery • Partner Enablement • B2B SaaS • Sport Tech • Climate / Mission-Driven Tech

Practical AI / Technical Fluency: API testing • prompt structuring • SQL-based workflows • AI-assisted research and writing • product requirement development • technical-to-commercial translation

PROFESSIONAL EXPERIENCE

Secberus — Co-Founder, Board Director & Founder-Operator

Remote / United States • Oct 2018 – Present

Co-founded a cyber governance and compliance technology company, operating across product, partnerships, GTM, strategic operations, board governance, and lean-company execution.

- Led the business-side transition from a traditional SaaS governance platform to an AI-first suite of API products, including the Compliance Mapping AI API and Gap Analysis API.
- Owned the business-side initiative to introduce a Text-to-SQL AI co-pilot into the flagship governance platform, translating customer workflow needs into product requirements, prompt / workflow concepts, internal priorities, and customer / partner positioning.
- Originated the concept and mathematical model for a risk algorithm, later developed with the CTO and engineering team; named co-inventor on the related patent.
- Worked hands-on enough with APIs, prompts, SQL-based workflows, and technical product inputs / outputs to translate engineering capabilities into credible customer conversations, partner narratives, proof-of-concept motions, and GTM materials.
- Built OEM and channel partnership motions across VARs, GSIs, MSSPs, consultancies, security platforms, GRC ecosystem partners, and enterprise technology vendors.
- Created executive, sales, partner, product, investor, and diligence materials that connected technical product capabilities to commercial use cases, board priorities, and partnership opportunities.
- Served on the Board of Directors and worked with investors on company strategy, governance, restructuring, operating plans, transaction-related preparation, and ongoing business decisions.
- Repositioned Secberus from a platform-led SaaS story to clearer enterprise, partner, and developer-facing narratives around compliance mapping, gap analysis, and workflow automation.

STARTUP, ADVISORY & VENTURE ECOSYSTEM EXPERIENCE

Startup, Advisory & Venture Roles

2013 – Present

- Science & Innovation Park, United Arab Emirates University (Paid Position) — EiR, Global Advisory Panel: Advised startup teams and ecosystem leaders on commercialization, operating models, founder development, and startup growth priorities.
- Polestar Strategies (Paid Position) — Consultant: fractional contract work with early-stage companies across consumer tech, edtech, B2B SaaS, and hardware turn product ideas into clearer market narratives, customer segments, investor materials, partner opportunities, and execution plans.
- Startup Leadership Program (Volunteer)— Regional Director & Mentor: Mentored founders and startup operators on positioning, GTM strategy, business models, operating priorities, and execution plans; supported regional program development and founder community building, and global expansion initiatives.
- Hamilton Venture Network, San Francisco Bay Area — Co-Director: Co-led a regional alumni entrepreneurship and venture network, creating opportunities for founder, investor, and operator engagement.

EARLIER OPERATING EXPERIENCE

Selected Roles

1998 – 2018

- ChoYou — SVP, Marketing: Led experiential marketing campaigns and innovation tours for global technology and enterprise clients including Salesforce, Salesforce.org, Oracle, NewVoiceMedia, and Total; doubled Salesforce and Oracle project contracts by creating prospect and customer experiences that expanded markets, drove revenue, and improved retention.
- iChampsports, Inc. — Founder: Founded an early sport-tech company focused on big data analytics in athletic development and talent identification; led product definition, customer discovery, business development, partnerships, operations, and GTM planning.
- Shopatron — Market Development Representative: Supported outbound market development, prospecting, qualification, customer engagement, and pipeline creation for an e-commerce technology company.
- FIS Alpine Ski Racing Coach: Held leadership roles at top U.S. ski racing academies and Universities; managed elite athlete development and performance strategy, global travel logistics, budgets, people management, and national / international projects including World Cup competitions with the US Ski Team. Consulted with NBC 2006 Olympic marketing production team.

EDUCATION, TRAINING & CERTIFICATION

- Hamilton College — B.A., Philosophy, 1998
- Startup Leadership Program — Fellow, Entrepreneurship / Entrepreneurial Studies, 2014–15
- Endeavor ScaleUP Program, Miami — Startup Accelerator, 2019
- Professional Scrum Master I, Scrum.org, issued Feb 2018
- The Improved Performance Group — Technology Sales Training, 2012

ADDITIONAL INFORMATION

Dual U.S. / French citizen relocating to the Var region of France in June 2026. Available for remote roles across France, the EU, UK, and U.S. time-zone overlap where appropriate. Comfortable working in remote, cross-functional, technical, startup, and international environments.
